Independent Auditors' Report

To the Shareholders of Jubilant Pharma Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Jubilant Pharma Limited and its subsidiaries including partnerships ("the Group"), which comprise the consolidated statement of financial position as at 31 March 2020, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 March 2020, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) and we have fulfilled our other ethical responsibilities in accordance with IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

U/S

Impairment of goodwill

See Note 2.7(ii), 2.8 and 4 (1) to the consolidated financial statements.

The key audit matter

As at 31 March 2020, the goodwill is carried at USD 160 million which represents 25% of the total non-current assets.

In addition to significance of the amount, the Group's assessment process is complex as it involves significant judgement in determining the appropriate allocation of the goodwill to cash generating unit ("CGU") and assumptions to be used to estimate the recoverable amount. The recoverable amount of the CGUs has been derived from discounted forecast cash flow models. These models use several key assumptions, including estimates of future sales volumes, and prices, operating costs, terminal value growth rates and the discount rate.

How the matter was addressed in our audit

Our audit procedures in this area included, among others:

- determined the appropriateness of allocation of goodwill to the cash generating unit
- tested the design and implementation of the Group's controls in determining the carrying amount and the recoverable amount of the cash generating unit to which the goodwill is allocated;
- involved our valuation specialists to assist in evaluating the inputs and methodologies used to estimate the recoverable amount;
- evaluated the appropriateness of the assumptions applied to key inputs such as revenue projections, discount rate and terminal growth rates based on our knowledge of the Group and the industry with the assistance of our valuation specialists;
- examined the causes of differences between past cash flow projections and actual cash flows;
- performed sensitivity analysis of the key assumptions used to determine which changes to assumptions would change the outcome of impairment assessment;
- compared the recoverable amount of the cash generating unit to the carrying amount to determine impairment loss, if any; and
- assessed the adequacy of related disclosures in the consolidated financial statements on the assumptions underlying the impairment assessment performed by the Group.

Ulsn

Impairment of intangible asset under development

See Note 2.8 and 4(2) to the consolidated financial statements.

The key audit matter

As at 31 March 2020, the intangible assets under development is carried at USD 69.6 million which represents 11% of total non-current assets.

In addition to significance of the amount, the Group's assessment process is complex as it involves significant judgement in estimating the recoverable amount and the costs to complete the development. the Group's assessment of recoverable amount primarily involves significant judgement in estimating the revenue growth, expected market share and discount rate.

How the matter was addressed in our audit:

- tested the design and implementation of controls over the Group's review of impairment assessment
- examined the causes of differences between past cash flow projections and actual cash flows in respect of intangible assets put to use
- for samples selected, evaluated the appropriateness of the assumptions used in key inputs such as forecast revenue, gross margin and discount rate based on our knowledge of the Group and the industry with the assistance of our valuation specialists.
- interviewed key research & development personnel and commercial personnel to evaluate the assumptions used
- performed sensitivity analysis of the key assumptions used to determine which changes to assumptions would change the outcome of impairment assessment
- compared the recoverable amount of the intangible assets under development to its carrying amount to determine impairment loss, if any
- assessed the adequacy of related disclosures in the consolidated financial statements

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

W

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ukn

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is K G Pasupathi.

and its subsidiaries
Consolidated Financial Statements
For the financial years ended 31 March 2020 and 2019*

- ** No. of shares as at 31 March 2020 and 31 March 2019 is 326,758,994. There is no change in the number of shares during the respective years. All issued ordinary shares are fully paid. There is no par value for these ordinary shares. The holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at general meetings of the Company.
- # Represents difference between the consideration and carrying amount of net assets/liabilities for transactions among entities under common control to transfer out/in of any business or shares of entities under common control.
- ## Primarily represents effect of transactions with shareholders (other than those accounted for in merger reserve).
- @@ Remeasurement of defined benefit obligations comprises actuarial gains and losses.
- ^ Exchange differences arising on translation of foreign operations and exchange differences relating to intercompany balances forming part of net investment in foreign operations are recognised in other comprehensive income as described in accounting policy and accumulated in a separate reserve within the equity. The related cumulative amount is reclassified to profit or loss when the Group dispose or partially dispose off its interest in a foreign operation through sale, liquidation, repayment of share capital or abandonment of all, or part of, that entity or any inter-company balances forming part of the net investment are settled.
- * The board of directors of the Company at its meeting held on 12 September 2018 declared an interim dividend amounting to USD 8,169,000 (USD 0.025 per equity share) to the shareholder of the Company.
- *** The board of directors of the Company at its meetings held on 22 July 2019 and 25 February 2020 declared interim dividends amounting to USD 10,456,286 (USD 0.032 per equity share) and USD 10,783,047 (USD 0.033 per equity share) to the shareholder of the Company.

The accompanying notes form an integral part of these consolidated financial statements.

2 Significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements. These policies have been consistently applied by the Group entities to all the years presented, except for the adoption of newly issued accounting standard as set out in note 2.17.

2.1 Basis of preparation

(i) The consolidated financial statements have been prepared in compliance with International Financial Reporting Standard (IFRS) as issued by the International Accounting Standard Board, to reflect the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group.

(ii) Historical cost convention

These consolidated financial statements have been prepared under historical cost convention on accrual basis, unless otherwise stated.

2.2 Principles of consolidation

The consolidated financial statements comprise the financial statements of the Company and the entities controlled by the Company including its subsidiaries and partnerships. Subsidiaries are entities controlled by the Group. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- (i) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- (ii) Exposure, or rights, to variable returns from its involvement with the investee; and
- (iii) The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) The contractual arrangement with the other vote holders of the investee;
- (ii) Rights arising from other contractual arrangements;
- (iii) The Group's voting rights and potential voting rights; and
- (iv) The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of an entity begins when the Group obtains control over that entity and ceases when the Group loses control over the entity. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the entity.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the Parent Company. When the end of the reporting period of the Parent Company is different from that of a member of the Group, the member prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the Parent Company to enable the Parent Company to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

2.3 Consolidation procedure

- (a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- (b) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains the accounting for any related goodwill.
- (c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. IAS 12 "Income Taxes" applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group. Losses applicable to the NCI in a subsidiary are allocated to the NCI even if doing so causes the NCI to have a deficit balance.

2.4 Current versus non-current classification

The Group presents assets and liabilities in the Consolidated Statements of Financial Position based on current/ non-current classification.

An asset is treated as current when:

- It is expected to be realised or intended to be sold or consumed in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is expected to be realised within twelve months after the reporting period; or
- It is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

The Group classifies all other assets as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities, respectively.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. Each entity of the Group has identified twelve months as its operating cycle for the purpose of current and non-current classification of assets and liabilities.

2.5 Measurement of fair values

A number of the accounting policies and disclosures require measurement of fair values, for both financial and non-financial assets and liabilities.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values used in preparing these consolidated financial statements is included in the respective notes.

2.6 Business combination

Business combinations (other than business combinations between common control entities) are accounted for using the purchase (acquisition) method. The cost of an acquisition is measured as the fair value of the consideration transferred, equity instruments issued and liabilities incurred or assumed at the date of exchange. The consideration transferred does not include amounts related to the settlement of pre-existing relationships; such amounts are generally recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income. The cost of acquisition also includes the fair value of any contingent consideration. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at fair value at the date of acquisition. For each business combination, the Group elects whether to measure the non-controlling interest in the acquiree at fair value or at the proportionate share and the acquiree's identifiable net assets. Transaction costs incurred in connection with a business combination are expensed as incurred.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured subsequently and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes to the fair value of the contingent consideration are recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income.

The excess of the consideration transferred over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised in Consolidated Statements of Profit and loss and Other Comprehensive Income as a gain on bargain purchase.

Business combinations involving transfer of assets and liabilities constituting a business or arising from transfers of interests in entities that are under the control of the shareholder that controls the Group are accounted for as if the acquisition had occurred at the beginning of the earliest comparative period presented or, if later, at the date that common control was established; for this purpose comparatives are revised if the impact is significant. The assets and liabilities acquired are recognised at their carrying amounts. The identity of the reserves is preserved and they appear in the consolidated financial statements of the Group in the same form in which they appeared in the financial statements of the acquired entity. The differences, if any, between the consideration and the amount of share capital of the acquired entity is transferred to equity.

2.7 Property, plant and equipment (PPE) and intangible assets

(i) Property, plant and equipment

Freehold land is carried at cost. All other items of property, plant and equipment are stated at cost, which includes capitalised finance costs, less accumulated depreciation and any accumulated impairment loss. Cost includes expenditure that is directly attributable to the acquisition of the items. The cost of an item of a PPE comprises its purchase price including import duty, and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition of its intended use and estimated costs of dismantling and removing the item. Any trade discounts and rebates are deducted in arriving at the purchase price.

Expenditure incurred on startup and commissioning of the project and/or substantial expansion, including the expenditure incurred on trial runs (net of trial run receipts, if any) up to the date of commencement of commercial production are capitalised. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Advances paid towards acquisition of property, plant and equipment outstanding at each reporting date, are shown under other non-current assets and cost of assets not ready for intended use before the year end, are shown as capital work-in-progress.

(ii) *Intangible assets*

- *Goodwill*

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes.

- Intangible assets (including intangible assets under development) that are acquired and implementation costs of software system are measured initially at cost.
- Internally generated goodwill is not recognised as an asset. With regard to other internally generated intangible assets:
 - Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income as incurred.
 - Development expenditure including regulatory cost and legal expenses leading to product registration/market authorisation relating to the new and/or improved product and/or process development is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Group intends to and has sufficient resources to complete development and to use the asset. The expenditure capitalised includes the cost of materials, direct labour, overhead costs that are directly attributable to preparing the asset for its intended use, and directly attributable finance costs (in the same manner as in the case of tangible fixed assets). Other development expenditure is recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income as incurred.

- After initial recognition, an intangible asset is carried at its cost less accumulated amortisation and any accumulated impairment loss. Subsequent expenditure is capitalised only when it increases the future economic benefits from the specific asset to which it relates.

(iii) Depreciation and amortisation methods, estimated useful lives and residual value

Property, plant and equipment are stated at cost less accumulated depreciation and amortisation. The Group depreciates property, plant and equipment over the estimated useful life using the straight-line method. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts and the resulting gain or loss is credited or charged to Consolidated Statements of Profit and Loss and Other Comprehensive Income. Freehold land is not depreciated.

The estimated useful lives of assets are as follows:

Buildings - factory and others	30-60 years
Plant and equipment	1-20 years
Office equipment	3-15 years
Furniture and fixtures	3-15 years
Vehicles - owned	3-5 years
Vehicles under finance lease (before 1 April 2019)	Period of the lease

Leasehold improvements (included in furniture and fixtures) are depreciated over their estimated useful life, or the remaining period of lease from the date of capitalisation, whichever is shorter.

Intangible assets are amortised over their estimated useful lives using the straight-line method.

The estimated useful lives of intangibles are as follows:

Product registration/market authorisation – Internally generated and Acquired	3-20 years
Acquired patents, trademarks/trade names and customer contracts	1-12 years
Software	5 years

Depreciation and amortisation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted if appropriate.

(iv) Derecognition

A property, plant and equipment and intangible assets is derecognised on disposal or when no future economic benefits are expected from its use and disposal. Losses arising from retirement and gains or losses arising from disposal of a tangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income.

2.8 Impairment of non-financial assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. The Group's other non-financial assets (including intangible assets under development) other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment loss recognised in respect of a CGU is allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets of the CGU (or group of CGUs) on a *pro rata* basis.

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognised in prior periods, the Group reviews at reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVPL)
- Equity instruments measured at fair value through other comprehensive income (FVOCI)

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the Consolidated Statements of Profit or Loss and Other Comprehensive Income. The losses arising from impairment are recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income. This category generally applies to trade and other receivables.

Debt instrument at FVOCI

A 'debt instrument' is classified as at the FVOCI if both of the following criteria are met:

- (a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- (b) The asset's contractual cash flows represent SPPI on the principal amount outstanding.

Debt instruments included within the FVOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified to the Consolidated Statements of Profit or Loss and Other Comprehensive Income. Interest earned whilst holding FVOCI debt instrument is reported as interest income using the EIR method.

Debt instrument at FVPL

FVPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortised cost or as FVOCI, is classified as at FVPL.

In addition, the Group may elect to designate a debt instrument, which otherwise meets amortised cost or FVOCI criteria, as at FVPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). The Group has not designated any debt instrument as at FVPL.

Debt instruments included within the FVPL category are measured at fair value with all changes recognised in the Consolidated Statements of Profit and Loss and Other Comprehensive Income.

Equity investments

All equity investments in scope of IFRS 9 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies are classified as at FVPL. For all other equity instruments, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to the Consolidated Statements of Profit or Loss and Other Comprehensive Income, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVPL category are measured at fair value with all changes recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income.

Impairment of financial assets

The Group recognises loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivables, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECL (or reversal) that is required to adjust the loss allowance at the reporting date is recognised as an impairment gain or loss in the Consolidated Statements of Profit or Loss and Comprehensive Income.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised (i.e., removed from the Group's Statement of Financial Position) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

(ii) Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVPL. A financial liability is classified as at FVPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVPL are measured at fair value and net gains and losses, including any interest expense, are recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income. Any gain or loss on derecognition is also recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the Consolidated Statements of Financial Position when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

2.10 Inventories

Inventories are valued at lower of cost or net realisable value except scrap, which is valued at net estimated realisable value.

The methods of determining cost of various categories of inventories are as follows:

Raw materials	Weighted average method
Stores and spares	Weighted average method
Work-in-progress and finished goods (manufactured)	Direct materials, direct labour and an appropriate proportion of variable and fixed production overheads, the latter being allocated on the basis of normal operating capacity
Fuel, consumables, packing material etc.	Weighted average method
Finished goods (traded)	Weighted average method
Goods in transit	Cost of purchase

Cost includes all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

The net realisable value of work-in-progress is determined with reference to the selling prices of related finished products. Raw materials and other supplies held for use in the production of finished products are not written down below cost, except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realisable value.

The comparison of cost and net realisable value is made on an item-by-item basis.

2.11 Cash and cash equivalents

Cash and cash equivalent comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.12 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Decommissioning provisions

In accordance with the applicable regulatory and contractual requirements, a decommissioning provision in respect of estimated costs of cleaning and repairing leased premises to be performed at the time it is vacated and dismantling and removing certain machinery and equipment to be performed at the time it is disposed off, is recognised. The provision is measured at the present value of the best estimate of the decommissioning costs.

2.13 Revenue recognition

Effective 1 April 2018, the Group adopted IFRS 15 “Revenue from Contracts with Customers” using the cumulative catch-up transition method, applied to contracts that were not completed as at 1 April 2018. In accordance with the cumulative catch-up transition method, the comparatives have not been retrospectively adjusted. There is no material effect on adoption of IFRS 15 on the consolidated financial statements.

Revenue from sale of products is recognised when the Group satisfies a performance obligation upon transfer of control of promised products to the customers at the time of shipment to or receipt of goods by the customers. Service income is recognised when the Group satisfies a performance obligation as and when the underlying services are performed. Any fees including upfront fees received in relation to contract manufacturing arrangements is recognised over the period over which the Group satisfies the underlying performance obligations.

The Group exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Group considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc. Invoices are issued as per the general business terms and are payable in accordance with the contractually agreed credit period.

Revenues are measured based on the transaction price allocated to the performance obligation, which is the consideration, net of taxes or duties collected on behalf of the government and applicable discounts and allowances including charge-backs, expected sales return and bill backs. The computation of these estimates using expected value method involves significant judgment based on various factors including contractual terms, historical experience, estimated inventory levels and expected sell-through levels in supply chain. The transaction price is allocated to each performance obligation in the contract on the basis of the relative standalone selling prices of the promised goods or services. The transaction price may be fixed or variable and is adjusted for time value of money if the contract includes significant financing component.

Contract assets are recognised when there is excess of revenue earned over billings on contracts, excluding amounts classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms. Contract liabilities are recognised when there are billings in excess of revenues. Contract liabilities relate to the advance received from customers and deferred revenue against which revenue is recognised when or as the performance obligation is satisfied.

Income in respect of entitlement towards export incentives is recognised in accordance with the relevant scheme on recognition of the related export sales. Such export incentives are recorded as part of other operating revenue.

2.14 Employee benefits

- (i) *Short-term employee benefits:* All employee benefits falling due within twelve months of the end of the period in which the employees render the related services are classified as short-term employee benefits, which include benefits like salaries, wages, short term compensated absences, performance incentives, etc. and are recognised as expenses in the period in which the employee renders the related service and measured accordingly.
- (ii) *Post-employment benefits:* Post-employment benefit plans are classified into defined benefits plans and defined contribution plans as under:

- (a) Gratuity

The Group has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount based on the respective employee's salary and the tenure of employment. The liability in respect of Gratuity (applicable for Indian entities of the Group), is recognised in the books of accounts based on actuarial valuation by an independent actuary. The gratuity liability for certain employees of the Group is funded with Life Insurance Corporation of India.

- (b) Provident fund

- (i) The Group makes contribution to the recognised provident fund – “VAM Employees Provident Fund Trust” (a multiemployer trust) for most of its employees in India, which is a defined benefit plan to the extent that the Group has an obligation to make good the shortfall, if any, between the return from the investments of the trust and the notified interest rate. The Group's obligation in this regard is determined by an independent actuary and provided for if the circumstances indicate that the Trust may not be able to generate adequate returns to cover the interest rates notified by the Government.

For other employees in India, provident fund is deposited with Regional Provident Fund Commissioner. This is treated as defined contribution plan.

- (ii) Group's contribution to the provident fund is charged to Consolidated Statements of Profit or Loss and Other Comprehensive Income.
- (c) The Group make contribution to various social security plans and insurance schemes as per local requirements and generally accepted practices in their respective country of incorporation. Such contributions are charged to Consolidated Statements of Profit or Loss and Other Comprehensive Income on accrual basis in the year in which liability to pay arise.

(iii) *Other long-term employee benefits*

Compensated absences

As per the Group's policy, eligible leaves can be accumulated by the employees and carried forward to future periods to either be utilised during the service, or encashed. Encashment can be made during service, on early retirement, on withdrawal of scheme, at resignation and upon death of the employee. Accumulated compensated absences are treated as other long-term employee benefits.

(iv) *Termination benefits*

Termination benefits are recognised as an expense when, as a result of a past event, the Group has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

(v) *Actuarial valuation*

The liability in respect of all defined benefit plans and other long-term employee benefits is accrued in the consolidated books of account on the basis of actuarial valuation carried out by an independent actuary using the Projected Unit Credit Method. The obligation is measured at the present value of estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans, is based on the market yields on Government securities as at the Reporting date, having maturity periods approximating to the terms of related obligations.

Remeasurement gains and losses on other long-term employee benefits are recognised in the Consolidated Statements of Profit and Loss in the year in which they arise. Remeasurement gains and losses in respect of all defined benefit plans arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in Remeasurement of defined benefit obligations in the Consolidated Statements of Changes in Equity and in the Consolidated Statements of Financial Position. Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost. Gains or losses on the curtailment or settlement of any defined benefit plan are recognised when the curtailment or settlement occurs. Any differential between the plan assets (for a funded defined benefit plan) and the defined benefit obligation as per actuarial valuation is recognised as a liability if it is a deficit or as an asset if it is a surplus (to the extent of the lower of present value of any economic benefits available in the form of refunds from the plan or reduction in future contribution to the plan).

Past service cost is recognised as an expense in the Consolidated Statements of Profit or Loss and Other Comprehensive Income on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits are already vested immediately following the introduction of, or changes to, a defined benefit plan, the past service cost is recognised immediately in the Consolidated Statements of Profit or Loss and Other Comprehensive Income. Past service cost may be either positive (where benefits are introduced or improved) or negative (where existing benefits are reduced).

2.15 Finance costs and finance income

Finance costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Finance cost also includes exchange differences to the extent regarded as an adjustment to the finance costs. Finance costs that are directly attributable to the construction or production or development of a qualifying asset are capitalised as part of the cost of that asset. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. All other finance costs are expensed in the period in which they occur.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the finance costs eligible for capitalisation. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income over the period of the borrowings using the effective interest method. Ancillary costs incurred in connection with the arrangement of borrowings are amortised over the period of such borrowings.

Finance income consists of interest income. Interest income or expense is recognised using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset or the amortised cost of the financial liability. In calculating interest income or expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

2.16 Income tax

Income tax expense comprises current and deferred tax. It is recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income except to the extent that it relates to a business combination, or items recognised directly in equity or in OCI.

- *Current tax:*

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received after considering uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

- *Deferred tax:*

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to freehold land and investment in subsidiaries, to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets include Minimum Alternate Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. MAT is a tax liability of an Indian company computed at specified rate on adjusted book profits as per applicable provisions of the Indian Income Tax Act. An Indian company is liable to pay MAT, if the income tax payable under normal provisions of the Indian Income Tax Act is less than tax payable under MAT.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

Deferred income tax is not provided on the undistributed earnings of the subsidiaries where it is expected that the earnings of the subsidiary will not be distributed in the foreseeable future.

Effective 1 April 2019, the Group has adopted IFRS interpretation IFRIC 23 “Uncertainty over Income Tax treatments” which clarifies how the recognition and measurement requirements of IAS 12 “Income taxes”, are applied where there is uncertainty over income tax treatments. There is no significant impact on account of adoption of this amendment.

2.17 Leases – Group as a lessee

Policy applicable from 1 April 2019

In January 2016, International Accounting Standards Board issued IFRS 16 “Leases”, which is effective for annual reporting periods beginning on or after 1 January 2019. IFRS 16 replaces existing leases guidance, including IAS 17 *Leases*, IFRIC 4 *Determining whether an Arrangement contains a Lease*, SIC-15 *Operating Leases – Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. IFRS 16 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (1) the contract involves the use of an identified asset; (2) the Group has substantially all of the economic benefits from use of the asset through the period of the lease; and (3) the Group has the right to direct the use of the asset.

The Group’s lease asset classes primarily consist of leases for buildings and vehicles, which typically run for a period of 3 to 5 years, with an option to renew the lease after that date. For certain leases, the Group is restricted from entering into any sub-lease arrangements. At the date of commencement of the lease, the Group recognises a right-of-use asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases). For these short-term leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

Right-of-use assets and lease liabilities includes the options to extend or terminate the lease when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income.

The lease liability is initially measured at amortised cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates based on information available as at the date of commencement of the lease. Lease liabilities are remeasured with a corresponding adjustment to the related right-of-use asset if the Group changes its assessment of whether it will exercise an extension or a termination option. Lease liability and right-of-use asset have been separately presented in the Consolidated Statements of Financial Position and lease payments have been classified as financing cash flows.

IFRS 16 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Group makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Group considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to Group's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

Policy applicable before 1 April 2019

At the inception of each lease, the lease arrangement was classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

Finance leases

Assets leased by the Group in its capacity as lessee where substantially all the risks and rewards of ownership vest in the Group were classified as finance leases. A finance lease was recognised as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Minimum lease payments made under finance leases were apportioned between the finance expense and the reduction of the outstanding liability. The finance expense was allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Operating leases

Leases in which a significant portion of the risks and rewards of ownership were not transferred to the Group as lessee were classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to the Consolidated Statements of Profit or Loss and Other Comprehensive Income on a straight-line basis over the period of the lease unless the payments were structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

Transition to IFRS 16

Effective 1 April 2019, the Group adopted IFRS 16 "Leases" applied to all lease contracts existing on 1 April 2019 using the modified retrospective approach on the date of initial application. Consequently, the Group recorded the lease liability at the present value of the lease payments discounted at the incremental borrowing rate and the right-of-use asset an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the Consolidated Statements of Financial Position immediately before the date of initial application. Comparatives have not been retrospectively adjusted.

On transition, the adoption of new standard resulted in recognition of right-of-use assets of USD 22,785,727 and lease liabilities of USD 19,951,193 with no material impact on the equity. On application of IFRS 16, the nature of expenses has changed from lease rent in previous periods to depreciation expense for the right-to-use asset and finance cost for interest accrued on lease liability. The effect of this adoption is insignificant on the profit for the year.

For transition, the Group has elected not to apply the requirements of IFRS 16 to leases which are expiring within 12 months from the date of transition on a lease-by-lease basis. The Group also used practical expedient and therefore, did not reassess, under IFRS 16, whether a contract is, or contains, a lease at the date of initial application. Further, as a practical expedient, on a lease-by-lease basis, the Group relied on its assessment as at 31 March 2019 as to whether leases are onerous applying IAS 37, Provisions, Contingent Liabilities and Contingent Assets, as an alternative to performing an impairment review. The Group has used a single discount rate to a portfolio of leases with similar characteristics. For leases that were classified as finance leases applying IAS 17, the carrying amount of the right-of-use asset and the lease liability at the date of initial application is the carrying amount of the lease asset and lease liability immediately before that date measured applying IAS 17. For those leases, the Group has accounted for the right-of-use asset and the lease liability applying IFRS 16 from the date of initial application.

2.18 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The Chairman and Managing Director of the Company is responsible for allocating resources and assessing performance of the operating segments and accordingly identified as the chief operating decision maker. Revenues, expenses, assets and liabilities, which are common to the Group as a whole and are not allocable to segments on a reasonable basis, have been treated as “unallocated revenues/expenses/ assets/liabilities”, as the case may be.

2.19 Foreign currency translation

(i) *Functional and presentation currency*

Items included in the financial statements of each of the Group’s entities are measured using the currency of the primary economic environment in which the entity operates (‘the functional currency’). The consolidated financial statements are presented in U.S. Dollars (“USD”).

(ii) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at Reporting date exchange rates are generally recognised in Consolidated Statements of Profit or Loss and Other Comprehensive Income.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets such as equity investments classified as FVOCI are recognised in other comprehensive income (OCI).

Effective 1 April 2018, the Group has adopted IFRS interpretation IFRIC 22 - *Foreign Currency Transactions and Advance Consideration* which clarifies the date of transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income when an entity has received or paid advance consideration in a foreign currency. There is no significant impact on account of adoption of this amendment.

(iii) *Group companies*

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Share capital and opening reserves and surplus are carried at historical cost.
- All assets and liabilities, both monetary and non-monetary, (excluding share capital, opening reserves and surplus) are translated using closing rates at reporting date.
- Profit and Loss items are translated at the respective quarterly average rates or the exchange rate that approximates the actual exchange rate on date of specific transaction.
- Contingent liabilities are translated at the closing rates at Reporting date.
- All resulting exchange differences are recognised in Other Comprehensive Income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities are recognised in other comprehensive income. When a foreign operation is sold or any inter-company balances forming part of the net investment are settled, the associated cumulative exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

The items of Consolidated Statements of Cash Flows are translated at the respective average rates or the exchange rate that approximates the actual exchange rate on date of specific transaction. The impact of changes in exchange rate on cash and cash equivalent held in foreign currency is included in effect of exchange rate changes.

2.20 Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all stated conditions. Government grants relating to income are deferred and recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income over the period necessary to match them with the costs that they are intended to compensate and presented within other operating revenue.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to Consolidated Statements of Profit or Loss and Other Comprehensive Income on a straight-line basis over the expected lives of the related assets and presented within other income.

2.21 Critical estimates and judgements

The preparation of consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements is included in the following notes:

- Impairment of non-financial assets – Note 2.8 and 4
- Assessment of useful life of property, plant and equipment and intangible asset – Note 2.7(iii)
- Acquisition of business – Note 2.6 and 24
- Valuation of inventories – Note 8
- Recognition of revenue and related accruals – Note 2.13
- Lease term: whether the Group is reasonably certain to exercise extension options – Note 2.17
- Inter-company balances forming part of net investment in a foreign operation – Note 2.19(iii)

The Group has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, inventories, property, plant and equipment, goodwill and intangible assets. In developing the assumptions relating to the possible future uncertainties in the global economic conditions, the Group has, as at the date of approval of these financial statements, used internal and external sources of information, including economic forecasts and estimates from market sources, on the expected future performance of the Group. On the basis of evaluation and current indicators of future economic conditions, the Group expects to recover the carrying amounts of these assets and does not anticipate any impairment to these financial and non-financial assets. However, the impact assessment of COVID-19 is a continuing process, given the uncertainties associated with its nature and duration. The Group will continue to monitor any material changes to future economic conditions.

2.22 Recent accounting pronouncements

Standards issued but not adopted

A number of new standards, amendments to standards and interpretations are not yet effective and have not been applied in preparing these financial statements. The Group has not early adopted the following new or amended standards in preparing these consolidated financial statements.

IFRS 3, *Business Combinations*

In October 2018, the IASB issued amendments to IFRS 3 – “Business Combinations” regarding the definition of a “Business”. The amendments:

- clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs;
- narrow the definitions of a business and of outputs by focusing on goods and services provided to customers and by removing the reference to an ability to reduce costs;
- add guidance and illustrative examples to help entities assess whether a substantive process has been acquired;
- remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce outputs; and
- add an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business.

The above amendments are effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2020. The Group does not expect the amendment to have any impact on its evaluation of whether activities and assets acquired are a business or a group of assets.

IAS 1 and IAS 8, *Definition of Material*

In October 2018, the IASB issued amendments to IAS 1 and IAS 8 – “Definition of Material”, to introduce the following three aspects to the new definition of “material”:

- **Obscuring:** The existing definition only focused on omitting or misstating information, however, IASB concluded that obscuring material information with information that can be omitted can have a similar effect.
- **Could reasonably be expected to influence:** The existing definition referred to “could influence” which IASB felt might be understood as requiring too much information as almost anything ‘could’ influence the decisions of some users even if the possibility is remote.
- **Primary users:** The existing definition referred only to “users” which IASB feared might be understood too broadly as requiring to consider all possible users of financial statements when deciding what information to disclose.

The above amendments are effective for annual reporting period beginning on or after 1 January 2020. The Group does not expect that the amendment to have any impact on its evaluation of “material” in relation to its consolidated financial statements.

IAS 1, *Classification of Liabilities*

In January 2020, IASB issued the amendments IAS 1 – “Presentation of Financial Statements” in Classification of Liabilities as Current or Non-Current, which affect only the presentation of liabilities in the statement of financial position. The amendments clarify that:

- classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period and align the wording in all affected paragraphs to refer to the “right” to defer settlement by at least twelve months;
- classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability; and
- settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The above amendments are effective for annual reporting period beginning on or after 1 January 2022, although early adoption is permitted. The Group does not expect the amendments to have any impact on its presentation of liabilities in its consolidated financial statements.

Finance costs capitalised	579,820	411,942

(1) Impairment testing of goodwill

For the purposes of impairment testing, goodwill is allocated to the Group's CGUs which represents the lowest level at which the goodwill is monitored for internal management purposes, which is not higher than the Group's operating segments.

The aggregate carrying amounts of goodwill allocated to CGU are as follows:

	2020	2019
	USD	USD
Allergy Therapy	14,149,899	14,149,899
Radiopharmaceutical	59,179,567	62,160,075
Generics	19,534,802	19,802,729
Contract Manufacturing Operation	67,180,395	68,400,194
Total goodwill	160,044,663	164,512,897

The recoverable amount of the cash generating units was based on its value in use. The value in use of these units was determined to be higher than the carrying amount. The Group performed an analysis of the sensitivity towards change in key assumptions. Based on such analysis, the Group believes that any reasonably possible change in key assumptions on which recoverable amount of the above mentioned CGUs is based would not cause the carrying amount to exceed the recoverable amount of related CGUs.

Value in use was determined by discounting the future cash flows generated from the continuing use of CGU. The calculation was based on the following key assumptions:

- (a) The anticipated annual revenue growth and margin included in the cash flow projections are based on past experience, actual operating results and the 5-year business plan in all periods presented.
- (b) The terminal growth rate represents management view on the future long-term growth rate.

	2020	2019
Allergy Therapy	2%	3%
Radiopharmaceutical	2%	1%-3%
Generics	0%-2%	2%-5%
Contract Manufacturing Operation	2%	3%

- (c) The pre-tax discount rate was estimated based on past experience and taking into consideration the industry's weighted average cost of capital.

	2020	2019
Allergy Therapy	7%	10%
Radiopharmaceutical	7%-8%	9%-10%
Generics	8%-14%	8%-12%
Contract Manufacturing Operation	8%-10%	10%-12%

- (d) The values assigned to the key assumptions represent the management's assessment of future trends in the industry and based on both internal and external sources.

(2) Impairment testing of intangible assets

The carrying value of internally generated product registration/market authorisation and other intangibles (including intangible assets under development) has been reviewed and based on prevailing market conditions driven by withdrawal of product filing, uneconomic pricing market conditions, technical and financial assessment, USD 4,292,832 and USD 1,484,150 have been charged off in Generics segment during the years ended 31 March 2020 and 31 March 2019, respectively and included under amortisation expense for the year/deductions to gross carrying amount of intangible assets under development and under depreciation, amortisation and impairment in the Consolidated Statements of Profit or Loss. The estimate of value in use was determined using a discount rate of 7% to 14% for all periods presented.

5 Investments

	2020	2019

* The terms of the loan arrangement contain certain restrictive covenants, mainly the requirements to maintain certain financial ratios. The Group was in compliance of such covenants as at 31 March 2020.

@@ During the year ended 31 March 2017, the Group issued unsecured 4.875% Senior Notes amounting to USD 300,000,000, repayable in single instalment in October 2021, with a prepayment option. During the year ended 31 March 2020, the Company has early redeemed USD 100,000,000 in aggregate principal amount of these Senior Notes on a pro-rata basis on 20 November 2019 together with accrued interest and redemption premium, and has cancelled equivalent amount of Senior Notes upon redemption. Premium of USD 2,437,500 and debt initiation costs of USD 635,803 on early redemption of Senior Notes has been included in finance costs for the year ended 31 March 2020. The terms of the offering memorandum contain certain restrictive covenants, mainly the requirements to maintain certain financial ratios. The Group was in compliance of such covenants as at 31 March 2020 and 31 March 2019.

@ During the year ended 31 March 2019, the Group issued unsecured 6% Senior Notes amounting to USD 200,000,000, repayable in single instalment in March 2024, with a prepayment option. The terms of the offering memorandum contain certain restrictive covenants, mainly the requirements to maintain certain financial ratios. The Group was in compliance of such covenants as at 31 March 2020 and 31 March 2019.

^^ During the year ended 31 March 2015, the Company had obtained an unsecured loan amounting to USD 60,000,000 from International Finance Corporation (IFC), due for bullet repayment along with the repayment premium in accordance with the terms of the contract in two equal instalments on 15 June 2020 (end of First repayment date i.e. 5 years from the date of disbursement) and 15 June 2021 (end of Final repayment date i.e. 6 years from the date of disbursement) if on or prior to such First repayment date there was (a) neither a Private Equity (PE) Investment nor a Qualifying IPO or (b) a PE Investment occurred but IFC did not convert the entire loan into shares and there was no Qualifying IPO. The term loan carried a differential return (in the form of discount in the event of conversion and premium in the event of redemption) to IFC under various scenarios based on the probabilities of occurrence of Private Equity (PE) Investment, Qualifying IPO and redemption. This instrument was considered as convertible debt as the characteristic of this instrument did not expose the counterparty to risk and rewards similar to those of an owner and, therefore, did not create a shareholder relationship. Accordingly, this instrument was classified as debt instrument.

Since inception, the management had always considered redemption as not probable. Further, during the year ended 31 March 2016, the management had assigned higher probabilities to PE Investments. However, during the years ended 31 March 2017 and 31 March 2018, the management reassessed the probability and assigned higher probability towards qualifying IPO. The return to the investor in the form of discount in conversion price was higher in the event of conversion at the time of qualifying IPO and therefore reassessment of probability resulted in Group recognising incremental cumulative expense in the year ended 31 March 2017. Based on these probabilities, pursuant to increase in fair value of this instrument (refer note 26), the Group recognised total expense of USD 10,000,000 and USD 18,000,000 for the years ended 31 March 2018 and 31 March 2017, respectively in the consolidated financial statements.

During the year ended 31 March 2019, the Company fully redeemed this loan on one time settlement of USD 135,000,000 based on mutual agreement. Post such one time settlement, any and all obligations of the Company to IFC under the aforesaid contract were irrevocably and unconditionally extinguished and settled in full. The payment was made from the proceeds of five year rated unsecured senior notes of USD 200,000,000 raised by the Company in international market in March 2019. Pursuant to such settlement, during the year ended 31 March 2019, the Group recognised a charge of USD 39,900,000 in the consolidated financial statements.

c) Assets pledged as security

Assets with following carrying amounts are pledged as collateral/security against loans and borrowings at year end.

As at 31 March 2020	60,718,644	2,190,720	62,909,364

Reflected in the Statement of financial position as follows:

Deferred tax assets and liabilities are offset to the extent there is legally enforceable rights to set off the recognised amounts, and it is intended to realise the assets and settle the liability on a net basis or simultaneously.

	2020 USD	2019 USD
Deferred tax assets	29,291,555	22,841,583
Deferred tax liabilities	(28,946,524)	(20,467,528)
Deferred tax assets (net)	<u>345,031</u>	<u>2,374,055</u>

In assessing the realisability of deferred income tax assets, management considers that ultimate realisation of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which the temporary differences become deductible. Management considers the scheduled reversals of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management believes that the Group will realise the benefits of those deductible differences. Accordingly, amount of the deferred income tax assets are considered realisable.

Reconciliation of deferred tax liabilities/(assets) (net)

	2020	2019
	USD	USD
Balance as at the commencement of the year	(2,374,055)	(9,066,163)
Tax expense during the year recognised in statement of profit or loss	5,654,614	5,843,059
Tax expense during the year recognised in other comprehensive income	1,617,102	31,863
Tax benefit during the year recognised in merger reserve (refer note 24)	(6,473,099)	–
Foreign currency translation adjustment	1,230,407	817,186
Balances as at the end of the year	(345,031)	(2,374,055)

a) Tax losses

	2020	2019
	USD	USD
Tax losses for which no deferred tax has been recognised	3,133,287	847,057

Tax losses of USD 78,637 and USD 548,854 as at 31 March 2020 and 31 March 2019 expire between 2021 and 2025. The remaining tax losses do not expire under the current tax legislation.

Deferred tax assets have not been recognised in respect of these losses as they may not be used to offset taxable profits elsewhere in the Group, they have arisen in subsidiaries that have been loss-making for some time, and there are no other tax planning opportunities or other evidence of recoverability in the near future.

b) Unrecognised temporary differences

	2020	2019
	USD	USD
Undistributed earnings	537,855,837	417,366,683
Indexation benefit of investment in subsidiaries	2,548,954	2,276,491
Indexation benefit of freehold land	375,792	335,622

Deferred tax asset has not been recognised on the above temporary differences as the Group is able to control the timing of the reversal of the temporary difference and it is probable that the temporary differences will not reverse in foreseeable future.

c) Tax-related contingencies – Refer note 31.

14 Provisions

	2020	2019
	USD	USD
Non-current		
Decommissioning provisions	5,034,380	2,186,758
Total non-current provisions	<u>5,034,380</u>	<u>2,186,758</u>
Current		
Provision for sales return	4,567,674	3,074,887
Total current provisions	<u>4,567,674</u>	<u>3,074,887</u>
Total provisions	<u><u>9,602,054</u></u>	<u><u>5,261,645</u></u>

The following table presents the movement in the decommissioning provisions during the year:

	2020	2019
	USD	USD
Balance at beginning of year	2,186,758	2,168,810
Provisions made during the year	2,679,408	–
Unwinding of discount	168,214	17,948
Balance at end of year	<u><u>5,034,380</u></u>	<u><u>2,186,758</u></u>

Decommissioning provision arises from regulatory and contractual requirements to perform certain asset disposal activities at the time that certain leased premises are vacated and certain machinery and equipment is disposed off.

The following table presents the movement in the provision for sales return during the year:

	2020	2019
	USD	USD
Balance at beginning of year	3,074,887	2,429,705
Provisions made during the year	4,082,485	2,864,793
Acquired through business combination (refer note 24)	115,384	–
Credits issued during the year	<u>(2,705,082)</u>	<u>(2,219,611)</u>
Balance at end of year	<u><u>4,567,674</u></u>	<u><u>3,074,887</u></u>

Reconciliation of the disaggregated revenue with the Group's reportable segments (refer note 28):

	Specialty Pharmaceuticals USD	Contract Development and Manufacturing Operations USD	Generics USD	Total USD
2020				
Revenue from contracts with customers	416,180,934	211,254,160	157,189,122	784,624,216
Other operating revenue	10,037,220	6,197,728	2,440,516	18,675,464
Revenue from reportable segments	<u>426,218,154</u>	<u>217,451,888</u>	<u>159,629,638</u>	<u>803,299,680</u>
2019				
Revenue from contracts with customers	401,877,311	205,701,147	143,999,826	751,578,284
Other operating revenue	3,042,309	4,190,286	2,515,965	9,748,560
Revenue from reportable segments	<u>404,919,620</u>	<u>209,891,433</u>	<u>146,515,791</u>	<u>761,326,844</u>

(B) Contract balances

	2020 USD	2019 USD	1 April 2018 USD
Trade receivables	116,049,995	116,797,767	105,941,967
Unbilled receivables	5,093,873	8,130,963	7,115,404
Contract liabilities	<u>6,711,193</u>	<u>5,246,931</u>	<u>6,671,555</u>

The amount of USD 2,238,093 and USD 4,030,775 recognised in contract liabilities at the beginning of the year has been recognised as revenue for the year ended 31 March 2020 and 31 March 2019, respectively.

Unsatisfied (or partially satisfied) performance obligations are subject to variability due to several factors such as terminations, changes in scope of contracts, periodic revalidations of the estimates, economic factors (changes in currency rates, tax laws etc). The aggregate value of transaction price allocated to unsatisfied (or partially satisfied) performance obligations, excluding those where original expected duration of one year or less, amounts to USD 4,935,185 and USD 3,614,345 as at 31 March 2020 and 31 March 2019, respectively, majority of which is expected to be recognised as revenue in the next two years.

Weighted average applicable tax rate	28.31%	33.88%
Tax at the weighted average applicable tax rate	38,959,878	33,922,156
Tax effect of amounts which are not deductible (taxable) in calculating taxable income		
Incremental allowance for research and development	(2,560,161)	(2,543,770)
Effect of prior year taxes	591,051	(346,085)
Effect of state taxes	2,638,897	398,780
Change in tax rate*	(2,125,379)	148,525
Unrecognised deferred tax on business loss	842,496	32,270
Non-deductible expenses	5,011,249	9,216,519
Tax on dividend from subsidiary	3,150,000	–
Others	(649,284)	334,563
	<u>45,858,747</u>	<u>41,162,958</u>

* During the current year, in accordance with Taxation Laws (Amendment) Act, 2019 in India, the Group has evaluated the net deferred tax liability as at 31 March 2020 in Jubilant Generics Limited (a subsidiary company), and based on the estimates, has written back an amount of USD 2,120,436 to the Statement of Profit and Loss.

24 Acquisition of business

The Group, through Jubilant Generics Limited (a wholly owned subsidiary), acquired assets and assumed liabilities pertaining exclusively to the IBP business from Jubilant Life Sciences Limited (“Ultimate holding company”) through a Business Transfer Agreement (“BTA”) with effect from 31 March 2020 (“acquisition date”), on a going concern basis, by means of a slump sale, for a lump sum consideration of INR 1,285,000,000 (equivalent USD 16,982,753) (“Business Combination”). The India Branded Pharmaceuticals is a formulations business that caters to the Indian market in therapeutic areas including chronic specialties like Cardiology and Diabetes.

This transfer being transaction between common control entities, the assets acquired and liabilities assumed have been recorded at historical cost in the consolidated financial statements. The excess of consideration over historical cost as of the date of transaction amounting to USD 18,524,207, net of related deferred tax amounting to USD 6,473,099, has been recorded as an adjustment to Merger Reserve. Since, the acquisition of business does not materially impact the consolidated financial statements, Business Combination has been accounted from the acquisition date and the comparatives have not been revised.

25 Employee benefits

(A) Defined contribution plans

- a. The Group entities located in India and Singapore have certain defined contribution plans such as provident fund, employee state insurance, employee pension scheme, wherein specified percentage is contributed to these plans. During the year, the Group has contributed following amounts to:

	2020	2019
	USD	USD
Employer's contribution to provident fund*	30,099	28,344
Employer's contribution to employee's pension scheme	426,031	379,028
Employer's contribution to employee state insurance	31,336	47,944

* Includes contribution for certain employees in India where Provident Fund is deposited with Government authority e.g. Regional Provident Fund Commissioner.

- b. The Group entities located in United States of America have a 401(k) plan, where eligible employees are permitted to participate in the defined contribution plan. Participants may voluntarily contribute eligible pre-tax and post-tax compensation of up to 100% of their annual compensation in accordance with the annual limits as determined by the Internal Revenue Service (IRS). Employees at or above the age of 50 may choose to contribute additional compensation as "catch-up" contributions in accordance with the IRS annual limits. Employees receive a 100% match of their contributions up to 3% of their eligible compensation and 50% match of their contributions over 3% upto 5% of their eligible compensation. The company's matching contributions vest 100% immediately for all employees in the United States. The Group has contributed USD 3,712,922 and USD 3,072,765 for the years ended 31 March 2020 and 31 March 2019, respectively.
- c. The entities of the Group located in Canada contribute to a Registered Retirement Savings Plan (RRSP), a trust registered with Canada Revenue Agency (CRA) and to Quebec pension plan (QPP). Under RRSP plan, the Group contributes equivalent to the contribution made by the employee, up to a maximum of 5% of the employees' base salary. Under QPP plan, the Group contributes equivalent to the contribution made by the employees at the rate of 5.70% and 5.55% of the employees' base salary for the years ended 31 March 2020 and 31 March 2019, respectively.

During the year, the Group has contributed following amounts to:

Plan under which contributions made	2020	2019
	USD	USD
Registered retirement savings plan (RRSP)	935,382	984,634
Quebec pension plan (QPP)	1,324,008	1,269,531

Further, the entities of the Group located in Belgium contribute to social security fund named as RijksSocialeZekerheid (RSZ). Under these plan employees have to contribute 13% of their compensation and the Group makes a contribution of 33.33% of the employee's annual compensation. The Group has contributed USD 24,912 and USD 32,956 for the years ended 31 March 2020 and 31 March 2019, respectively.

(B) Defined benefit plans

i. Gratuity

In accordance with International Accounting Standard (IAS) 19 "Employee Benefits", an actuarial valuation has been carried out in respect of gratuity. The discount rate assumed is 6.80% p.a. and 7.65% p.a. as at 31 March 2020 and 31 March 2019, respectively which is determined by reference to market yield at the Statement of financial position date on government bonds. The retirement age has been considered at 58 years and mortality table is as per IALM (2012-14) and IALM (2006-08) as at 31 March 2020 and 31 March 2019, respectively.

The estimates of future salary increases, considered in actuarial valuation is 10% p.a. for first three years and 6% p.a. thereafter as at 31 March 2020 and 31 March 2019, taking into account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The plans assets are maintained with Life Insurance Corporation of India in respect of gratuity scheme for certain employees of one unit of the Group. The details of investments maintained by Life Insurance Corporation are not available with the Group, hence not disclosed. The expected rate of return on plan assets is 6.80% p.a. and 7.65% p.a. as at 31 March 2020 and 31 March 2019, respectively.

Reconciliation of opening and closing balances of the present value of the defined benefit obligation:

	2020	2019
	USD	USD
Present value of obligation at the beginning of the year	2,767,380	2,694,870
Acquired through business combination (refer note 24)	63,634	-
Current service cost	447,356	403,560
Interest cost	206,873	194,047
Actuarial loss/(gain)	283,371	(90,778)
Benefits paid	(453,491)	(280,091)
Effect of exchange rate changes	(267,418)	(154,228)
Present value of obligation at the end of the year	<u>3,047,705</u>	<u>2,767,380</u>

Fair value of plan assets:**

	2020	2019
	USD	USD
Plan assets at the beginning of the year	463,922	417,581
Expected return on plan assets	34,680	30,133
Contribution by employer	109,820	105,282
Benefits paid	(88,987)	(60,545)
Actuarial gain/(loss)	3,416	(4,824)
Effect of exchange rate changes	(43,693)	(23,705)
Plan assets at the end of the year	<u>479,158</u>	<u>463,922</u>

** In respect of one location, the plan assets were invested in insurer managed funds.

Reconciliation of the present value of defined benefit obligation and the fair value of the plan assets:

	2020	2019
	USD	USD
Present value of obligation at the end of the year	3,047,705	2,767,380
Fair value of plan assets at the end of the year	<u>(479,158)</u>	<u>(463,922)</u>
Net liabilities recognised in the Statement of financial position	<u>2,568,547</u>	<u>2,303,458</u>

Group's best estimate of contribution during next year is USD 642,345 and USD 631,762 as at 31 March 2020 and 31 March 2019, respectively.

Expense recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income under employee benefits expense:

	2020	2019
	USD	USD
Current service cost	447,356	403,560
Interest cost	<u>172,193</u>	<u>163,914</u>
Net cost recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income	<u>619,549</u>	<u>567,474</u>

Amount recognised in the Consolidated Statements of Profit or Loss and Other Comprehensive Income under other comprehensive income:

	2020	2019
	USD	USD
Actuarial loss due to demographic assumption change	11,642	5,275
Actuarial loss due to financial assumption change	163,529	10,145
Actuarial loss/(gain) due to experience adjustment	108,200	(106,198)
Actuarial (gain)/loss on plan assets	(3,416)	4,824
Effect of exchange rate changes	–	(5,230)
Amount recognised in the other comprehensive income	279,955	(91,184)

Sensitivity analysis:

Assumptions	Discount rates		Future salary increase	
2020				
Sensitivity level	0.5% increase	0.5% decrease	0.5% increase	0.5% decrease
Impact on defined benefit	(93,573)	98,951	98,752	(94,251)
2019				
Sensitivity level	0.5% increase	0.5% decrease	0.5% increase	0.5% decrease
Impact on defined benefit	(81,531)	86,320	86,851	(82,756)

The sensitivity analysis above has been determined based on reasonably possible changes of the respective assumptions occurring at the end of the year and may not be representative of the actual change. It is based on a change in the key assumption while holding all other assumptions constant.

Maturity profile of the defined benefit obligation:

	2020	2019
	USD	USD
Within one year	384,399	405,742
Between one to three years	608,012	496,360
Between three to five years	480,515	395,085
Later than five years	1,574,779	1,470,193
	3,047,705	2,767,380

ii. Provident Fund:

The Group makes contribution to a recognised provident fund “VAM Employees Provident Fund Trust” (a multiemployer trust) for most of its employees in India, which is a defined benefit plan to the extent that the Group has an obligation to make good the shortfall, if any, between the return from the investments of the trust and the notified interest rate.

Actuarial assumptions made to determine interest rate guarantee on exempt provident fund liabilities are as follows:

	2020	2019
Discount rate	6.80%	7.65%
Guaranteed rate of return	8.50%	8.65%

The Group has contributed to provident fund USD 893,779 and USD 815,112 for the years ended 31 March 2020 and 31 March 2019, respectively. (refer note 30)

(C) Other long term benefits (compensated absences):

	2020	2019
	USD	USD
Present value of obligation at the end of the year	2,003,632	1,826,279

Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques and the significant unobservable inputs used in determination of fair value of the Level 3 financial instruments not measured at fair value:

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
Other financial assets (loan to related parties)	<i>Discounted cash flows:</i> The valuation model considers the present value of expected receipts discounted using an adjusted discount rate	Adjusted discount rate 7.12% (2019: 8.40%)	The estimated fair value would increase (decrease) if the adjusted discount rate was lower (higher)

Note:

- (a) Fair valuation of financial assets and liabilities with short term maturities is considered as approximate to respective carrying amount due to the short term maturities of these instruments. Further, for the current year the fair value disclosure of lease liabilities is also not required.
- (b) Fair value of non-current financial liabilities has not been disclosed as there is no significant difference between carrying value and fair value.
- (c) Fair value of loans and borrowings is as below:

	Level of hierarchy	Fair value	
		2020 USD	2019 USD
Senior Notes 2021	1	186,250,000	299,625,000
Senior Notes 2024	1	188,826,000	202,790,000
		<u>375,076,000</u>	<u>502,415,000</u>

Reconciliation of convertible debt instrument measured at fair value using level 3 of fair value hierarchy is as below:

	2020 USD	2019 USD
Opening balance	–	96,900,000
Loss recognised in profit or loss	–	39,900,000
Repayment #	–	(136,800,000)
Closing balance	–	–

Includes coupon payment of USD 1,800,000 during the year ended 31 March 2019 as per the terms of loan agreement.

(d) Fair value of other financial assets is as below:

	Level of hierarchy	Fair value	
		2020	2019
		USD	USD
Other financial assets *	3	53,520,600	107,580,082

* The fair value of other non-current financial assets is based upon a discounted cash flow analysis that uses the aggregate cash flows from principal and finance income over the life of the asset and current market interest rates. The fair value of other current financial assets is considered as approximate to carrying amount due to the short term maturities of these instruments.

(e) There are no transfers between level 2 and level 3.

27 **Financial risk management**

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

Risk management framework

The Group's board of directors has overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group, through three layers of defence namely policies and procedures, review mechanism and assurance aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations. The Audit committee of the Board with top management oversees the formulation and implementation of the Risk management policies. The risk and mitigation plan are identified, deliberated and reviewed at appropriate forums.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, investments and other financial assets.

The carrying amount of financial assets represents the maximum credit exposure.

Trade receivables and other financial assets

The Group has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information, and business intelligence. Sale limits are established for each customer and reviewed annually. Any sales exceeding those limits require approval from the appropriate authority as per policy.

In monitoring customer credit risk, customers are grouped according to their credit characteristics, including whether they are an individual or a legal entity, whether they are institutional, dealers or end user customer, their geographic location, industry, trade history with the Group and existence of previous financial difficulties.

The customers of the Group are spread across North America, Europe, Asia and rest of the world regions though majority of customers are based out of North America, and accordingly, trade accounts receivables are concentrated in these geographies. To reduce credit risk, the Group performs on going credit evaluation of customers. As at 31 March 2020 and 31 March 2019, one customer is having 10.69% and 8.14% share in total trade receivables of the Group respectively.

Expected credit loss for trade receivables:

Based on internal assessment which is driven by the historical experience/ current facts available in relation to default and delays in collection thereof, the credit risk for trade receivables is low. The Group estimates its allowance for trade receivable using lifetime expected credit loss.

Group's exposure to credit risk for trade receivables using provision matrix is as follows:

	----- 2020 -----			----- 2019 -----		
	Gross carrying amount USD	Allowance for credit losses USD	Net carrying amount USD	Gross carrying amount USD	Allowance for credit losses USD	Net carrying amount USD
Not due	82,879,082	-	82,879,082	96,560,121	(30,368)	96,529,753
0-90 days	30,813,159	(29,028)	30,784,131	18,521,888	(108,097)	18,413,791
90-180 days	2,276,340	(307,622)	1,968,718	1,321,562	(173,113)	1,148,449
180-270 days	309,652	(174,123)	135,529	542,608	(231,928)	310,680
270-360 days	140,575	(114,029)	26,546	279,722	(135,183)	144,539
More than 360 days	2,044,751	(1,788,762)	255,989	1,922,929	(1,672,374)	250,555
	<u>118,463,559</u>	<u>(2,413,564)</u>	<u>116,049,995</u>	<u>119,148,830</u>	<u>(2,351,063)</u>	<u>116,797,767</u>

Movement in the expected credit loss allowance of trade receivables are as follows:

	2020 USD	2019 USD
Balance at the beginning of the year	2,351,063	1,696,482
Add: Provided during the year (net of reversal)	122,014	1,076,612
Add: Acquired through business combination (refer note 24)	9,743	-
Less: Amount written off *	(2,081)	(330,029)
Effect of exchange rate changes	(67,175)	(92,002)
Balance at the end of the year	<u>2,413,564</u>	<u>2,351,063</u>

* Assets are written off when there is no reasonable expectation of recovery, such as a debtor declaring bankruptcy or failing to engage in a payment plan with the Group.

Expected credit loss on financial assets other than trade receivables:

With regards to all financial assets with contractual cash flows other than trade receivables, management believes these to be high quality assets with negligible credit risk. The management believes that the parties from which these financial assets are recoverable, have strong capacity to meet the obligations and where the risk of default is negligible or nil and accordingly no provision for expected credit loss has been provided on these financial assets. Break up of financial assets other than trade receivables have been disclosed in Consolidated Statements of Financial Position.

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's treasury department is responsible for managing the short term and long term liquidity requirements. Short term liquidity situation is reviewed daily by Treasury. Longer term liquidity position is reviewed on a regular basis by the Board of Directors and appropriate decisions are taken according to the situation.

Exposure to liquidity risk

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted.

	Carrying amount USD	Contractual cash flows		
		Total USD	Within 1 year USD	More than 1 year USD
As at 31 March 2020				
Non-derivative financial liabilities				
Loans and borrowings ⁽¹⁾	440,894,513	511,708,228	65,958,228	445,750,000

	<u>602,693,012</u>	<u>711,876,881</u>	<u>130,482,419</u>	<u>581,394,462</u>

⁽¹⁾ Carrying amount presented as net of unamortised transaction cost.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The Group is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the respective functional currencies of Group companies. The functional currencies of Group companies are primarily the INR, USD, CAD and Euro. The currencies in which these transactions are primarily denominated are INR, USD, CAD and Euro.

The Group follows a natural hedge driven currency risk mitigation policy to the extent possible. Any residual risk is evaluated and appropriate risk mitigating steps are taken, including but not limited to entering into forward contracts and interest rate swaps.

Majority of Group's customers are based in North America. To a lesser extent, the Group also manufacture and sell products to customers outside North America in multiple foreign currencies and face translation and transaction risks related to fluctuations in the exchange rates of such currencies. Our consolidated financial statements are presented in U.S. dollars, and by translating the foreign currency financial statements of our foreign subsidiaries into U.S. dollars, the amounts of our revenue from operations (net), profit for the year and total assets, on a consolidated basis, are affected by prevailing rates of exchange, in particular for Canadian dollars and Indian rupee.

Exposure to currency risk

The summary quantitative data about the Group's exposure to currency risk is as follows:

	USD	EUR	CAD	Others
2020				
Trade and other receivables	219,130,303	2,325,575	673,774	764,596
Cash and cash equivalents	30,936,145	2,255	–	1,264,510
Trade and other payables	29,505,881	2,485,144	1,164,378	1,643,643
Net statement of financial position exposure	220,560,567	(157,314)	(490,604)	385,463
2019				
Trade and other receivables	118,928,534	3,619,591	537,162	2,439,809
Cash and cash equivalents	53,187,724	8,199	–	226,399
Trade and other payables	27,582,851	2,080,193	1,259,561	1,373,453
Net statement of financial position exposure	144,533,407	1,547,597	(722,399)	1,292,755

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Euro, US dollar or CAD against all other currencies at 31 March would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

	Profit or loss (before tax)		OCI (before tax)	
	Strengthening	Weakening	Strengthening	Weakening
2020				
USD (1% movement)	450,606	(450,606)	1,755,000	(1,755,000)
EUR (1% movement)	(1,573)	1,573	–	–
CAD (1% movement)	(4,906)	4,906	–	–
Others (1% movement)	3,855	(3,855)	–	–
2019				
USD (1% movement)	1,445,334	(1,445,334)	–	–
EUR (1% movement)	15,476	(15,476)	–	–
CAD (1% movement)	(7,224)	7,224	–	–
Others (1% movement)	12,928	(12,928)	–	–

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk because funds are borrowed at both fixed and floating interest rates. Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate. The borrowings of the Group are principally denominated in rupees and US dollars with a mix of fixed and floating rates of interest. The Group has exposure to interest rate risk, arising principally on changes in benchmark lending rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings.

Exposure to interest rate risk

The interest rate profile of the Group's interest bearing financial instruments as reported to the management of the Group is as follows:

	Nominal amounts	
	2020	2019
	USD	USD
Fixed-rate borrowings	400,000,000	502,279,268
Floating-rate borrowings*	44,208,228	8,834,809

* floating interest rates are based on Marginal Cost of funds based Lending Rate (MCLR) plus spread, reset at specified intervals.

The sensitivity analyses below have been determined based on the exposure to interest rates for floating rate liabilities assuming the amount of the liability outstanding at the year-end was outstanding for the whole year.

If interest rates had been 25 basis points higher/lower and all other variables were held constant, the Group's profit would decrease/increase by USD 8,805 and USD 8,236 for the years ended 31 March 2020 and 31 March 2019, respectively. This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings.

28 Capital management

The Group's objectives when managing capital are to:

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- Maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the following gearing ratio:

Net debt (total borrowings net of cash and cash equivalents) divided by Total 'equity' (as shown in the statement of financial position, including non-controlling interests).

The gearing ratios were as follows:

Particulars	2020	2019
	USD	USD
Net debt	302,568,547	415,515,960
Total equity	429,563,380	408,007,416
Net debt to equity ratio	0.70	1.02

Also refer note 11.

29 Segment information

(a) Description of segments and principal activities

The Chairman and Managing Director of the Company has been identified as the Chief Operating Decision Maker (CODM) as defined by IFRS 8, Operating Segments. Operating Segments have been defined and presented based on the regular review by the CODM to assess the performance of segment and to make decision about allocation of resources. Accordingly, the Group has determined following reportable segment based on nature of its product and service:

- **Specialty Pharmaceuticals** comprising Radiopharmaceuticals (including radiopharmacies) and Allergy Therapy products;
- **Contract Development and Manufacturing Operations (CDMO)** comprising Contract manufacturing of Sterile Injectables and Non-Sterile products (CMO) and Active Pharmaceutical Ingredients (APIs); and
- **Generics** comprising Solid Dosage Formulations.

The Group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the consolidated financial statements of the Group as a whole.

No operating segments have been aggregated to form the above reportable operating segments.

Common allocable costs are allocated to each segment according to the relative contribution of each segment to the total common costs.

Revenue, expenses, assets and liabilities which relate to the Group as a whole and not allocable to segments on reasonable basis have been included under 'unallocated revenue / expenses / assets / liabilities'.

Finance costs, finance income and fair value gains and losses on financial instruments are not allocated to individual segments as the underlying instruments are managed on a Group basis.

Borrowings, current taxes, deferred taxes and certain financial assets and liabilities are not allocated to those segments as they are also managed on a Group basis.

Information related to each reportable segment is set out below. Segment results (profit/(loss) before interest and tax) is used to measure performance because management believes that this information is the most relevant in evaluating the results of the respective segments relative to other entities that operate in the same industries.

(b) Information about reportable segments

(c) Geographical information

The geographical information analyses the Group's revenue and non-current assets by the Company's country of domicile and other countries. In presenting the geographical information, segment revenue has been based on the geographical location of customers and segment assets were based on the geographical location of the assets:

(i) Segment revenues:

	2020	2019
	USD	USD
North America	660,648,291	612,895,481
Europe	69,947,926	74,070,503
Asia	44,066,623	44,989,383
Rest of the world	28,636,840	29,371,477
Total	<u>803,299,680</u>	<u>761,326,844</u>

(ii) Segment non-current assets*:

	2020	2019
	USD	USD
North America	402,732,116	392,145,266
Europe	10,044,599	10,315,260
Asia**	153,430,435	162,017,370
Total	<u>566,207,150</u>	<u>564,477,896</u>

* Non-current assets exclude financial instruments and deferred tax assets.

** Asia includes USD 334,429 and USD 7,743 as at 31 March 2020 and 31 March 2019, respectively, based in Singapore (country of domicile).

(d) Major customer

For the years ended 31 March 2020 and 31 March 2019, there is one customer of Specialty Pharmaceuticals segment contributing USD 98,247,080 and USD 93,966,373, respectively of the consolidated revenue of the Group.

	4,734,104	11,814,633

* Jubilant Pharma Holdings Inc. and its subsidiaries file a US Consolidated tax return. The Company determined that certain U.S. tax filings related to dual consolidated losses had inadvertently not been filed on a timely basis. Failure to make these filings on a timely basis could result in the IRS disallowing the Company's use of such dual consolidated losses for U.S. federal income tax purposes for certain periods resulting in payment of taxes, interest and applicable penalties. However, promptly upon discovering this omission, amended tax returns for relevant periods have been filed voluntarily along with reasonable cause relief request to make the appropriate election and disclosures pursuant to applicable Treasury Regulations.

Future cash outflows in respect of the above matters as well as for matters listed under note 31(b) below are determinable only on receipt of judgments/decisions pending at various stages/forums.

(b) Other contingent liabilities

- (i) A customer had filed an arbitration claim in 2013 before the International Court of Arbitration, International Chamber of Commerce, Paris (“ICC”) against Jubilant Pharmaceuticals NV (“JPNV”), a stepdown subsidiary of the Company in Belgium alleging contravention of certain provisions of Licensing and Supply agreement between the parties and claiming damages (excluding interest) amounting to €2,083,421 (USD 2,279,054 and USD 2,340,098 as at 31 March 2020 and 31 March 2019, respectively). JPNV has also filed a counter claim against this customer for damages amounting to €2,379,678 (USD 2,603,130 and USD 2,672,854 as at 31 March 2020 and 31 March 2019, respectively) in the same dispute. Partial Award No. 2 dated 5 September 2017 was passed by the Arbitrator wherein claims of the customer were allowed for €668,684 (USD 731,473 and USD 751,066 as at 31 March 2020 and 31 March 2019, respectively) but the customer was restrained from using, either directly or indirectly, the Dossiers and also directed to return the Dossiers to JPNV. Partial Award No. 3 dated 14 February 2018 was passed by the Arbitrator holding the customer liable to pay daily penalties of €5,000 (USD 5,470 and USD 5,616 as at 31 March 2020 and 31 March 2019, respectively) for any use, either directly or indirectly, of the Dossiers and €1,000 (USD 1,094 and USD 1,123 as at 31 March 2020 and 31 March 2019, respectively) for non-return of Dossiers to JPNV before 16 March 2018. On 5 March 2018, the customer challenged the Partial Awards No. 2 and 3 before Court of Brussels, which has vide interim order dated 24 August 2018 rejected the customer’s request for suspension of the Partial Award. These proceedings are pending for annulment of the said Awards. Final Award was passed on 20 September 2019 by the Arbitrator where under JPNV was directed to pay €668,684 (USD 731,473 and USD 751,066 as at 31 March 2020 and 31 March 2019, respectively) along with interest (as held in Partial Award No. 2). JPNV has challenged the Final Award, and has also filed for the enforcement of the Partial Award No. 3 which has been challenged by the Customer vide challenge filed in the court of Antwerp dated 28 February 2020. The Customer has also challenged the decision of the arbitrator dated 20 September 2019 for not reopening the proceedings refusing to abolish the daily penalties. Both the challenge proceedings are pending.
- (ii) During the year ended 31 March 2019, the Group received warning letter from U.S. Food and Drug Administration (“USFDA”) for its solid dosage formulations manufacturing facility located at Roorkee, India. As a result of this, USFDA may withhold approval of any new applications or supplements till the Group resolves the issues raised by the agency, however, the Group continues to manufacture and distribute existing products from its Roorkee facility. The Group has submitted comprehensive responses to the USFDA and has engaged with third party consultants to help in the remediation activities. The Group is taking all necessary steps to ensure further stringent controls at all its facilities.
- (iii) Additionally, the Group is involved in other disputes, lawsuits, claims, governmental and/or regulatory inspections, inquiries, investigations and proceedings, including commercial matters that arise from time to time in the ordinary course of business. The Group believes that none of these matters, either individually or in aggregate, are expected to have any material adverse effect on its consolidated financial statements.

The above does not include all other obligations resulting from claims, legal pronouncements having financial impact in respect of which the Group generally performs the assessment based on the external legal opinion and the amount of which cannot be reliably estimated.

32 Commitments as at year end

(a) Capital commitments

Estimated amount of contracts remaining to be executed on capital account (net of advances) is as under:

	2020	2019
	USD	USD
Property, plant and equipment	12,832,491	12,012,718
Intangibles assets	15,187,641	1,337,275
	28,020,132	13,349,993

(b) For lease commitments as at 31 March 2019, refer note 33.

(c) Other commitments:

Export obligation undertaken by the Group under EPCG scheme to be completed over a period of six years on account of import of capital goods with no import duty and remaining outstanding is USD 95,311 and USD 4,531,316 as at 31 March 2020 and 31 March 2019, respectively. Similarly, export obligation under Advance License Scheme on duty free import of specific raw materials, remaining outstanding is USD 9,216,819 and USD 9,230,615 as at 31 March 2020 and 31 March 2019, respectively.

33 Leases

Leases under IFRS 16 for the year ended 31 March 2020:

The details of the right-of-use assets held by the Group is as follows:

	----- 2020 -----	
	Depreciation charge for the year USD	Net carrying amount USD
Buildings	5,520,463	18,111,773
Plant and equipment	68,202	106,077
Office equipment	69,869	126,651
Vehicles	1,823,061	3,655,697
	7,481,595	22,000,198

Additions to the right-of-use assets during the year ended 31 March 2020 were USD 4,541,228.

Amount recognised in profit or loss:

	2020
	USD
Interest on lease liabilities	1,280,364
Rental expense relating to short-term leases	742,727

Amount recognised in statement of cash flows:

	2020 USD
Total cash outflow for leases	7,861,220

The weighted average incremental borrowing rate applied to lease liabilities as at 1 April 2019 is 5.91%.

The difference between the operating lease commitments disclosed applying IAS 17 as at 31 March 2019 in the consolidated financial statements for the year then ended and the lease liabilities recognised as at 1 April 2019 in these consolidated financial statements is primarily on account of inclusion of extension and termination options reasonably certain to be exercised and exclusion of short-term leases for which the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease, in measuring the lease liability in accordance with IFRS 16.

Leases under IAS 17 for the year ended 31 March 2019:

(i) Operating lease payments under cancellable leases:

	2019 USD
Premises and equipment	1,105,306
Vehicles*	26,691
	1,131,997

* Included under vehicle running and maintenance expense in note 22.

(ii) The Group has significant operating lease arrangements which are non-cancellable for a period up to 5 years. The leases have varying terms, escalation clauses and renewal rights.

The schedule of future minimum lease rental payments in respect of non-cancellable operating leases is set out below:

	2019 USD
Not later than one year	4,094,980
Later than one year but not later than five years	5,660,053
Later than five years	23,547
	9,778,580
Operating lease expenses	5,352,289

(iii) Assets acquired under finance lease:

Future minimum lease payments and their present values under finance leases in respect of vehicles are as follows:

Particulars	Minimum lease payments	Present value of minimum lease payments	Future interest
	2019	2019	2019
	USD	USD	USD
Not later than one year	1,245,499	1,119,702	125,797
Later than one year but not later than five years	1,220,285	1,159,566	60,719
Later than five years	–	–	–

There is no element of contingent rent or sub lease payments. There are no restrictions imposed by these lease arrangements regarding dividend and additional debt.

34 Research and development expenditure

The aggregate amount of research and development expenditure (excluding depreciation, amortisation and impairment) recognised as an expense is USD 15,235,107 and USD 15,847,374 during the years ended 31 March 2020 and 31 March 2019, respectively.
